## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 29-53, drawn to a method of increasing a plant's tolerance to hypoxic conditions by transformation with nucleic acid molecule encoding a plant non-symbiotic hemoglobin and a transformed plant thereof.

Group II, claim(s) 54-60, drawn to a method of determining if a seed is germinating.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of a method of transforming a plant with a plant non-symbiotic haemoglobin is known in the art. Dolferus R. *et al.* In Annals of Botany, January 1997; Vol. 79, Supplement A; pp. 21-31 teach a method of transforming *Arabidopsis* with constructs overexpressing *Arabidopsis* haemoglobin on page 29, column 1, in section *Arabidopsis* haemoglobin in lines 19-27, and thus teaches the special technical feature of Group I, i.e. the method step of introducing a plant non-symbiotic haemoglobin into a plant. Further, the special technical feature of Group I the method step of transforming a plant with a nucleic acid molecule encoding a non-symbiotic haemoglobin does not share the special technical feature of Group II, i.e. the method step of measuring protein or gene expression of a plant non-symbiotic haemoglobin in a seed extract.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
